

GROUP 5

Ellen's Formula

Core Problem: Lack of regulatory harmonization

Ellen's issues:

- Financial challenges
- Access to school and supplementary materials
- Quality of learning
- Time
- Self development

Solutions:

- Regulatory Body / the Union Government allocate spectrum free
- As oppose to current practice of expensive auction spectrum fees, give all operators the required spectrum for free and give them different obligations, such as:
 - Targets to reach all remote parts
 - Connect all schools, hospital, clinics, government offices, and public places
 - To incorporate health and education services
 - Allow service providers to use free internet to deliver free digital education support materials
- Free spectrum will enable free high speed internet
- Government creates favorable environment for innovations
